

ITAY OSOVLANSKI

Senior Backend Engineer | Distributed Systems & Cloud

@ itayosov@gmail.com
in linkedin.com/in/itayosovlanski
* Tel Aviv, Israel
+972-54-567-7528

SKILLS

Backend & Distributed Systems

C# • Python • Java • Microservices • Distributed Systems • REST APIs

Cloud & DevOps

Kubernetes • Docker • CI/CD • Azure • AWS

Databases

SQL • MySQL • MongoDB • Redis • PostgreSQL

AI-Assisted Development

Claude Code • Cursor IDE • Agentic Workflows • Prompt Engineering

Security & Compliance

AML/KYC Compliance • Data Integrity • Secure Transaction Flows

Soft Skills

- System Design
- Performance Optimization
- Cross-functional Collaboration
- Agile Methodologies
- Technical Leadership
- Code Review

LANGUAGES

Hebrew	Native
English	Fluent

SUMMARY

Senior Backend Engineer with 5+ years designing and scaling distributed systems in fintech. Expert in microservices architecture achieving 99.99% availability, transaction processing for 10k+ concurrent users, and security-first development. Leverages AI-assisted development tools (Claude Code, Cursor) to accelerate delivery while maintaining code quality. Military background in elite cybersecurity unit.

PROFESSIONAL EXPERIENCE

Full Stack Developer

September 2021 - Present

Payoneer | Tel Aviv, Israel

Global fintech platform enabling cross-border payments for millions of businesses worldwide.

- Designed and implemented C#/Python microservices ensuring 99.99% availability for global payment processing.
- Integrated payment gateways and banking APIs with full AML/KYC compliance and secure transaction flows.
- Reduced transaction latency by 20% through backend optimization, supporting 10k+ concurrent users.
- Leveraged Claude Code and Cursor IDE to accelerate development cycles while maintaining code quality standards.

Software Developer

2021

SolidCAM Israel | Israel

Leading CAD/CAM software company for CNC machining and manufacturing automation.

- Developed Python-based data pipelines for AI-driven manufacturing automation.
- Implemented DevOps foundations with Kubernetes, Docker, and CI/CD pipelines.
- Accelerated AI prototyping through optimized data preparation and analysis workflows.

Software Developer

2016 - 2018

Efcom | Israel

Technology company focused on IoT solutions and mobile applications.

- Built AWS-based backend services and web tools for distributed worker management.
- Developed automated IoT testing frameworks in C#/Arduino, reducing manual QA by 30%.
- Created Android applications in Java with reliable backend integration.

QA & Automation Developer

2012 - 2015

IDF - Matzov (Telecom Division) | Israel

Elite encryption & cybersecurity defense unit in Israeli Defense Forces.

- Served in elite encryption & cybersecurity defense unit handling classified communications.
- Built automated testing frameworks for web/data systems supporting mission-critical defense communications.
- Developed end-to-end testing infrastructure for secure, high-reliability systems with zero tolerance for failures.
- Gained deep expertise in security protocols, encryption standards, and defense-grade quality assurance.

EDUCATION

Ben-Gurion University

2018 - 2021

B.Sc. Computer Science | Beer Sheva, Israel

Ohel Shem High School

2008 - 2012

Gifted Children Program - Computer Science Track | Ramat Gan, Israel
